## Bathware

---

Elevate Every *Space*.  
*Energize* Every Life.

“At Sunheartrt,  
we believe every tile holds space.  
And every space holds energy.  
Our creations are crafted  
not just to build homes but  
to shape harmony.”

Bathware by  
Sunheartrt

Born out of entrepreneurial spirit in 2020,  
Bathware by Sunheartrt - styled 'bathware'  
- is the sanitaryware division of the  
renowned Sunheartrt Ceramix. Established  
under the legacy of excellence, Bathware  
is dedicated to redefining personal spaces  
with solutions that balance hygiene,  
comfort and aesthetics.

A commitment to functionality user  
comfort and sustainability drives  
Bathware. Each product is designed to  
support modern lifestyles while aligning  
with environmental responsibility, offering  
features that enhance water conservation  
and uplift users' everyday experiences.

Company strength

 Amongst the Top 10 Ceramic Brands	 1220+ Brand Dealers	 3-Star Export House
 Investments in Renewable Energy	 300+ Designs/SKUs	 Presence in 75+ Countries

# Production Process

## 1. Ball Mill

Raw materials are finely ground and mixed in the ball mill to form a smooth, consistent slurry, which is the foundation for the casting process.

## 2. Battery Casting

The prepared slurry is poured into plaster molds using battery casting machines. These molds shape the products with high accuracy and detail.

## 4. Green Pieces

These unfired ceramic forms are carefully trimmed, smoothed, and refined by skilled hands to ensure the final shape and surface quality.

## 3. Green Pieces

After casting, the semi-formed items are known as green pieces. These green pieces are dried for the firing process.

## Production Process of Sunhearrrt Bathware

At Sunhearrrt, each bathware product is the result of a meticulous and technologically advanced process. Combining tradition with innovation, the production journey ensures every piece reflects precision, durability and aesthetic appeal. From raw materials to the final packed product, each stage is carefully monitored to meet the highest standards of quality and design excellence.

## 5. Dryer

Green pieces are dried in a controlled setting to remove moisture uniformly. This step is crucial before firing.

## 6. Kiln

The dried pieces are fired at high temperatures in the kiln. This vitrifies the material, giving it strength, hardness and a smooth finish.

## 7. Finished Pieces

Post-firing, each product is inspected for quality, glaze finish and durability. Only flawless pieces proceed to the next step.

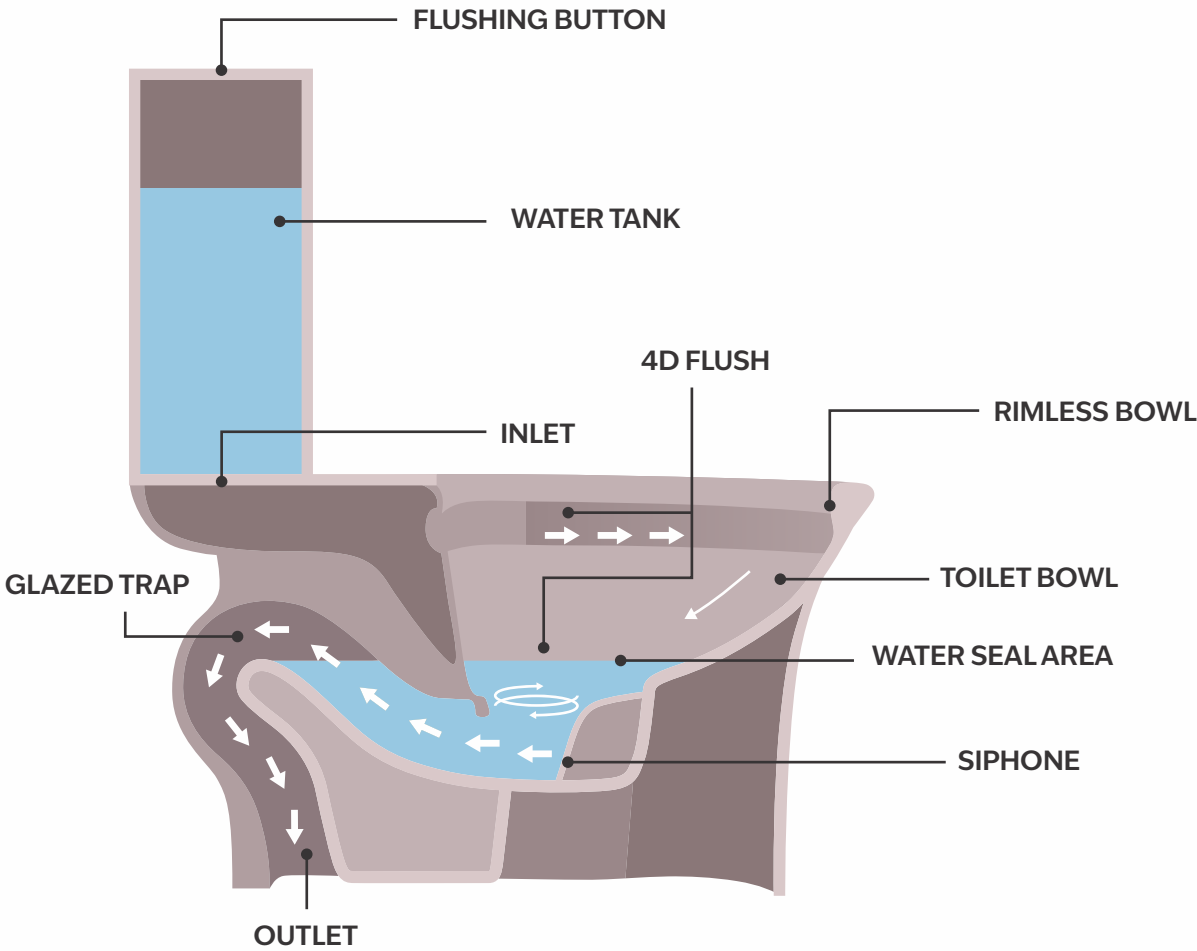

## 8. Packed Products

The final bathware products are securely packed with protective materials to ensure safe transportation and delivery to customers.

# How Does It Work?

Flush creates a powerful surge of water - initiating a swirling motion that effectively cleans the bowl while pushing the waste toward the trapway. As water fills and flows down into the siphon section of the trapway, it creates a siphonic action - a vacuum that rapidly pulls the waste and water through the weir and out the outlet.

# A promise of quality!

Crafted from premium raw materials, processed with diligence, and subjected to rigorous quality checks, Sunhearrt Bathware products are built to last. Backed by a team of experts, each product comes with a 15-year warranty on its ceramic body, a seal of trust that reflects the confidence Sunhearrt places in its craftsmanship.

# Features

	RIMLESS		UF SEAT COVER		SIPHONIC FLUSHING SYSTEM
	HYGIENIC		PP SEAT COVER		4D TECHNOLOGY
	EASY TO CLEAN		SOFT CLOSE		5D TECHNOLOGY
	SIDE CONCEALED WC FITTINGS		TOP CONCEALED WC FITTINGS		6D TECHNOLOGY
	DUAL FLUSH (6/3)		JET SPRAY SYSTEM		WASHDOWN FLUSHING SYSTEM
	400 KG WEIGHT TEST		GLAZED DUCT & FLUSHER INTERIOR		FUNCTIONALLY TESTED
	3/6 LT WC PANS				

# Rimless Design

## Toilet Bowl Without An Edge

Sunhearrt Bathware's design offers a seamless, edge-free bowl that enhances hygiene and makes cleaning effortless. By eliminating the hard-to-reach rim, there is no place for germs and stains to hide.

MORE ECOLOGICAL

MORE HYGIENIC

SUNHEARRT DESIGN

TRADITIONAL DESIGN

## What Is Siphonic Flushing?

Siphonic flushing releases water in a circular motion that creates a vacuum effect.

As the water rises, gravity helps pull the waste from the toilet bowl, optimising every flush.

SOFT CLOSE

## What Is Washdown Flushing?

Washdown flushing is a type of toilet flushing system that uses water weight and gravitational force to eliminate waste from the toilet bowl.

In a washdown toilet, water from the tank pours directly into the bowl. The force of the water pushes waste material down the outlet. Washdown toilets typically have a small water surface area in the bowl.

## Silent Operating Toilet Seat & Cover

The silent operating toilet seat ensures a noise-free experience - ideal for contemporary homes where peace and privacy matter. The soft-close operation gently lowers the seat and seat cover without slamming, enhancing user comfort and contributing to a more refined bathroom ambiance.

## Quick Release Seat Cover

Sunhearrt Bathware's quick-release seat cover can be detached in seconds for easier maintenance and deeper cleaning. This practical feature allows users to access and sanitize hard-to-reach areas with minimal effort.

## 1<sup>st</sup> Time In India 6D Siphonic Flushing

Revolutionizing Indian bathware, Sunhearrt introduces the country's first **6D Siphonic Flushing System**. This advanced flushing technology delivers a powerful, multi-directional water flow that ensures complete bowl coverage and thorough waste removal in a single flush.

## Thin Edges For Style & Statement

The exclusive thin basin design brings a refined, contemporary look to any bathspace. The sleek silhouette maximizes usable space while offering a premium aesthetic appeal, making it the perfect centerpiece for modern bath spaces seeking both form and function.

## Sunhearrt Super Glaze

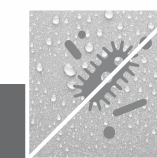

The Super Glaze of Sunhearrt Bathware offers ultra-smooth surfaces, high resistant to stains, and is effortless to clean. This advanced glaze enhances the product's lifespan and maintains a radiant shine, making bathspaces beautiful and exceptionally durable.

# Advance Flushing System With Water Saving Technology

Sunhearrt's advanced flushing system uses optimized water pressure and flow patterns to remove waste while conserving water efficiently. This environmentally conscious innovation reduces water consumption without compromising performance.

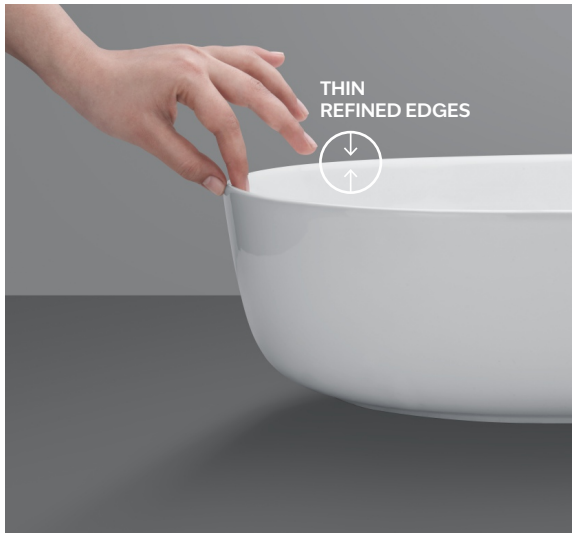

# Swirl Flushing System

The Swirl Flushing System ensures a 360-degree water movement that cleans every inch of the bowl with precision. This intelligent system provides deep cleaning power with reduced splashing, combining hygiene, efficiency, and silent operation.

# Thin Basin For Stylish Outlook

Ultra-thin basin edges redefine modern elegance, offering a clean, crisp profile that elevates the aesthetic of any bathroom. These sleek edges enhance the visual appeal and provide more usable surface area, combining cutting-edge design with everyday practicality.

TIPS FOR MAINTENANCE

The Bathware from SUNHEARRT have a smooth, impermeable and practically scratch-resistant surface, which is resistant to most of the acids and alkalis mainly encountered in the home. For daily care, you will usually only need water and damp cloth. Tidemarks, grease and soap residues can be removed quickly and easily with a vinegar-based or bathroom cleaner. Like any other part of your house, the bathroom can be made to look great and made to last if it is taken care of regularly. Here are some simple tips that can help you keep your bathroom glittering and fresh everyday.

WASH BASINS

The wash basin needs to be washed with a mild detergent at least once a day. After washing, the basin must be wiped with a dry cloth to avoid water stains, especially on dark colours. Wash basins not cleaned for along time can accumulate stains. To remove the stains, diluted hydrochloric acid may be used.

CLOSETS

Use a plastic bristled brush with a plastic handle to scrub the EWC with a cleanser, at least once a day. After flushing the EWC, clean it with the brush to avoid minute discoloring. If there has been no maintenance over a long period of time, water deposits and discoloration are formed on the surface of areas that get wet. In such cases, these stains/marks can be removed with the help of diluted hydrochloric acid. Do not use powder paste, thinner or dry cleaning liquids. To remove fine scratches, use Brasso or car rubbing compound and then polish with a polish cloth.

INTERNAL FITTING OF CISTERNS

Accumulation of dust/small piece stones/sand coming through pipeline in the water on inlet and outlet rubber diaphragms may result in leakage of water. In case of such malfunctioning, all you have to do is open inlet/outlet valve and clean the diaphragms or replace them. Use only genuine spares parts.

NOTE: All given product dimensions are approximate, Please check actual piece before installation as dimensional variations are inherent character of Ceramic products.
